Experience

Frontend Developer Bootcamp

May 2023 - Oct 2023

Frontend Simplified

- Immersive frontend web development course that focus on developing professional websites using HTML5, CSS3 (+ BEM), JavaScript, and React best practices
- Developed my personal e-portfolio website along with different hands-on projects
- Modern, professional, and responsive design, that gives applications great user experience in any device

Frontend Developer Support

Jul 2023 - Current

Frontend Simplified

- Supported junior students using HTML, CSS, Flexbox, JavaScript and React best practises
- Utilized debugging best practises using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests

Projects

Netflix Clone | [HTML](#), [Tailwind CSS](#), [JavaScript](#), [React](#), [Firebase](#)

- Developed a robust full-stack application using React for the frontend and Firebase for backend services, including user authentication and data storage.
- Utilized Axios to make API calls, ensures smooth fetching and display of data from TMDB API.
- Advanced user feature that allows users to save and remove shows to watch later under their account.
- Created a responsive and visually appealing UI that mimics the Netflix user interface, providing a seamless experience across various devices.

E-Commerce Library Project | [HTML](#), [CSS](#), [JavaScript](#), [React](#)

- Designed a library of reusable React components, such as product cards and filtering options, for code reusability and maintainability.
- Interactive shopping experience with a dynamic cart system, utilizing React state management for seamless addition and removal of items
- Utilized React Router to implement smooth and intuitive navigation, ensuring users can easily explore and interact with the e-commerce platform.

Footwear Landing Page | [HTML](#), [CSS](#), [JavaScript](#), [React](#)

- Seamless user experience across devices by implementing fully responsive styling, accommodating a wide range of screen sizes and resolutions.
- Utilized Tailwind CSS to create a visually striking and modern landing page for a footwear brand.
